OBJECTIVE

Dynamic and innovative Computer Science Engineering student specializing in Cloud and Edge Computing, proficient in AWS cloud architecture and MERN stack development. Completed an internship with Vehinova Technologies, contributing to the design and deployment of high-performance cloud-native solutions. Experienced in database management, API integration, and responsive UI design. Passionate about utilizing emerging technologies to create scalable, secure, and efficient software systems through teamwork and analytical problem-solving.

EDUCATION

Bachelor of Technology in Computer Science and Engineering Koneru Lakshmaiah University, Guntur. CGPA : 7.88/10	2022 - 2026
IPE, BIEAP, Class XII Sri Sarada Jr College, Vijayawada, 52%	2020 - 2022
SSC, BSEAP, Class X Sikhara School, Vijayawada, 85%	2019 - 2020

TECHNICAL SKILLS

Programming Languages	C, Python, Java(Basic)
Web Development	HTML, CSS, Django, React.js, Node.js, Express.js, Python
Databases	MySQL, PostgreSQL, MongoDB
Cloud and Tools	AWS, Git, GitHub, VS Code, PyCharm
Specialized Areas	Google Cloud, Cloud-native development, API integration, Edge computing

PROJECTS

Online Blogging System, <i>Minor Project</i>	December 2023 - April 2024
- Designed and implemented a full-featured blogging platform with modules for user registration, post creation, and commenting using Django Framework. - Utilized Django ORM for database integration and PostgreSQL for efficient data storage and retrieval. - Integrated secure authentication and session management to protect user credentials and prevent unauthorized access. - Deployed the project using GitHub version control and followed MVC architecture for maintainable code design. - Enhanced user experience with Bootstrap-based responsive UI, achieving seamless usability across devices.	
Online Book Store <i>Minor project</i>	July 2023 - November 2023
- Engineered a scalable full-stack e-commerce platform using React.js, Node.js, and Express.js, improving load efficiency and responsiveness. - Designed and implemented RESTful APIs for seamless communication between frontend and backend, enhancing data retrieval speed by 30 - Integrated MongoDB for robust data handling, enabling efficient management of user accounts, inventory, and transactions. - Developed secure authentication and authorization workflows using JWT and bcrypt, strengthening data protection and user privacy. - Optimized UI/UX design for cross-device compatibility, resulting in an intuitive and responsive user interface aligned with modern web standards.	

INTERNSHIPS / TRAININGS

Vehinova, Vijayawada — *Summer Internship*

May 2024 – Jun 2024

- Completed a 6-week internship focused on MERN stack web development.
- Designed and developed responsive web pages using React.js for the front end.
- Created backend APIs using Express.js and Node.js for handling requests and data processing.
- Connected the application to MongoDB Atlas for cloud-based data storage.
- Tested features to ensure proper functionality and fixed bugs during development.

CERTIFICATIONS

-Aviatrix Certified Engineer Multi-Cloud Networking Associate (ACE-MCNA)	February 2026
-Oracle Cloud Infrastructure 2025 Certified Foundations Associate	December 2025
-Automation Anywhere Certified Essentials RPA Professionals	November 2025
-Salesforce Certified AI Associate	November 2024

EXTRA-CIRRUCULAR ACTIVITIES AND ACHIEVEMENTS

- Participated in Hackathons and Coding Challenges on HackerRank and LeetCode.
- Active Volunteer at Sweccha NGO – contributed to community-driven initiatives and sustainability campaigns.
- Collaborated with volunteers to organize outreach and awareness events on social development and innovation.
